jigsawmarine.co.uk

In 2026, Jigsaw Marine Limited was engaged by Brittany Ferries to carry out flooring and servery refurbishment works aboard the Brittany Islander, replacing worn entrance flooring with new IMO approved matting, refitting the deck 7 servery with a new bain marie and replacing blinds, curtains and handrails elsewhere on the vessel.

VESSEL INFORMATION

Islander is a ROPAX ferry built in 2005 by Volharding Shipyards in the Netherlands, now operated by Brittany Ferries.

Length = 124.9 metres

Beam = 23.4 metres

Built date = 2005

Tonnage = 13,906 GT

Capacity = 400 passengers

PROJECT SCOPE

Jigsaw Marine Limited carried out two separate projects aboard Islander: the replacement of 44m² of entrance flooring with new Hammer matting and a Deck 7 servery refit, including the replacement of a 3-section bain marie.

The 44m² of entrance flooring was replaced across two 12-hour shifts and the new bain marie was fitted during a vessel turnaround in France.

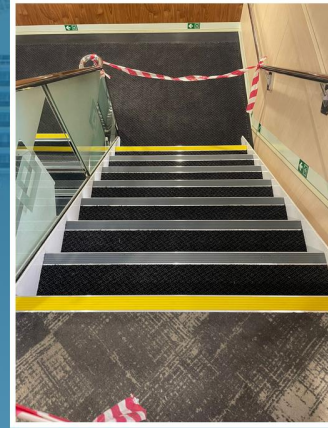

Blinds, curtains and handrails were also replaced as part of additional refurbishment works.

ENTRANCE FLOORING

Aboard the Brittany Islander, the Jigsaw Marine team removed and replaced worn entrance flooring. The project involved removal of 44m² of Amtico flooring using a mechanical bully, followed by the supply and fit of 44m² of Hammer entrance matting in charcoal, fitted with marine approved adhesive to IMO standards.

SERVERY REFIT

Aboard the Brittany Islander, the team carried out a servery refit on deck 7, replacing the existing bain marie with a new 3-section unit.

The work included disconnection and removal of the existing bain marie, modification of the worktop and relocation of the till point by approximately 400mm, and installation of the new unit complete with an extended stainless steel border. The bain marie was fitted during a vessel turnaround in France.

The team also supplied and fitted 13 magnetic stop blinds with locking side channels, 4 pairs of curtains in the crew cabins and new stainless steel handrails, carried out across multiple turnaround days.

OUTCOMES/SUMMARY

- Flooring works completed across two 12-hour shifts, minimising disruption to passengers and crew.
- The entrance area now features durable, IMO-approved matting, built to withstand years of high-traffic marine use.
- A new 3-section bain marie has modernised the deck 7 servery, improving both function and presentation for crew and passengers.
- New blinds, curtains and handrails have refreshed the surrounding areas, adding both comfort and safety improvements throughout.
- Full compliance with maritime safety standards ensured throughout.

Jigsaw Marine's skilled team delivered the Brittany Islander refurbishment with exceptional success, leaving the ship's crew and passengers with a refreshed, safer and more functional space.
